## ATTESTATION

**To COST application:**

**European Monetary Unification, from Antiquity to Modern Times**

The Hungarian Numismatic Society supports the COST-EMU project which has a great importance to both professional and private researchers of monetary history.

Involvement in the international communication would be very useful for our members who are interested in different problems of monetary history, as sometimes it is very difficult for them to find partners dealing with the similar subject at home. The project makes possible for the young generation of researchers in history to make direct contacts with the community of the European scholars.
