Letter of support

This is to show our support for the planned COST network organized by Dr Depeyrot, Paris. The network has a great potential to bring together European colleagues around a common theme – monetary unions and the processes involved in a historical perspective – thereby opening up for qualified discussion on issues of great historical and cultural interest as well as of contemporary relevance and utility. For our institution it is of great interest to be part of such international efforts and we regard the proposed action as a good opportunity to make scientific contacts and progress. We therefore give the proposal our full support.
